Project Veritas on Wednesday released a video featuring a sit-down interview with a Pfizer whistleblower who went on the record with internal emails showing the pharma giant scrambling to hide information about their Covid vaccine.

In the last two weeks Project Veritas has released four under cover videos exposing the truth about Covid vaccines.

- Part One: HHS whistleblower goes public with secret recordings: 'Govt doesn't want to show the vaccine is full of sh*t'
- Part Two: FDA on under cover video: 'Blow dart African American' and wants 'Nazi Germany registry for unvaccinated'
- Part Three: Johnson & Johnson: 'Kids shouldn't get the f*cking vaccine' because of 'unknown repercussions'
- Part Four: Pfizer scientists admitted natural immunity may be better than the Covid vaccine

Vanessa Gelman, Pfizer's Senior Director of Worldwide Research said Pfizer is using human fetal cells in their Covid vaccine program and hiding that information from the public.

"That is staggering for society because of religious exemptions," James O'Keefe said to Vanessa Gelman.

- **Vanessa Gelman, Pfizer Senior Director of Worldwide Research** "From the perspective of corporate affairs, we want to avoid having the information on fetal cells floating out there... The risk of communicating this right now outweighs any potential benefit we could see, particularly with general members of the public who may take this information and use it in ways we may not want out there. We have not received any questions from policy makers or media on this issue in the last few weeks, so we want to avoid raising this if possible."
- **Gelman:** "We have been trying as much as possible to not mention the fetal cell lines...One or more cell lines with an origin that can be traced back to human fetal tissue has been used in laboratory tests associated with the vaccine program."

- **Philip Dormitzer, Pfizer Chief Scientific Officer: “HEK293T cells, used for the IVE assay, are ultimately derived from an aborted fetus. On the other hand, the Vatican doctrinal committee has confirmed that they consider it acceptable for Pro-Life believers to be immunized. Pfizer’s official statement couches the answer well and is what should be provided in response to an outside inquiry.”**
- **Strickler: “They’re being so deceptive in their emails, it’s almost like it is in the final vaccine. It just made me not trust it.”**

I wish people would quit calling this jab a vaccine. It's a Wu-flu flu shot.

I didn't read it all, it made me sick. Why would they want to inject us with fetal cells? Ones they contaminated?

The truth will set you free... but before it does that, it will also either make you throw up in your mouth, enrage you, or both.

I hope James O'Keefe is real, but be careful putting your complete trust in a stranger. The evil ones are very clever.

This is such a non-issue. These are fetal cell lines... that is, cells that have been derived from other cells. The original cells date back, literally, many decades. The polio vaccine used fetal cell lines from a failed pregnancy in the 1930s. Just because they're fetal cell lines, doesn't mean the original fetus was aborted. There are two line from the 1960s, prior to abortion being legal, in common use. It's not like scientists are buying jars of aborted fetuses to make vaccines.

I'm sure scientists all over the world have dissected these vaccines, and if there was fetal anything in them, we'd know about it; this is a trillion-dollar business for these drug companies, they're pushing their way above the pack, with some within taking bribes.

"particularly with general members of the public who may take this information and use it in ways we may not want out there"
- in other words it would be very bad for sales because it would create more resistance to the forced vaccinations.

 **Here is some of the big pharma SPIN talking points going around, they are in full defense mode folks** Smell the desperation?

Fetal cell lines are cells that grow in a laboratory. They

X

retal cell lines are cells that grow in a laboratory. They descend from cells taken from abortions in the 1970s and
