The Devil is in the Details and The Trends Look Like Hell

Some may want to “Follow the Science” since a majority feel it is correct but math provides the true answers. Math takes the data and determines the trends. While we must learn from the past 22 months of this pandemic we also must understand the current trends so we can determine the correct path forward.

In the first 3 months of 2020 in the US, 3,603 people died from Covid-19. In April the deaths accelerated and varied between 9k and 15k per week. Eventually, 333,199 died between April 1, 2020 and Dec 31, 2020 for a daily average of 1,216 deaths.

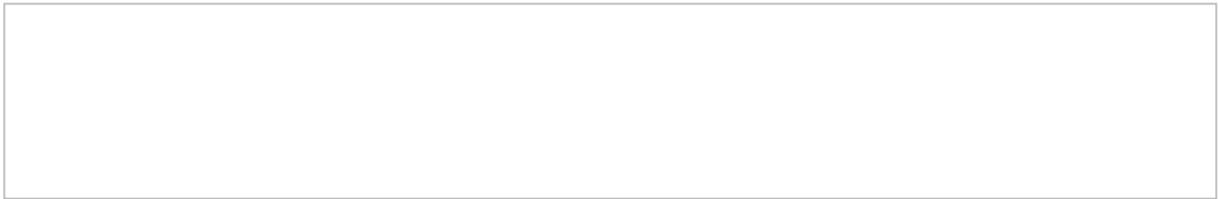

During the October 22nd 2020 debate Joe Biden stated, “Folks, I will take care of this. I will end this. I will make sure we have a plan”.

According to www.worldometers.info/coronavirus/ there have been an additional 414,890 deaths from Covid-19 between Jan 1, 2021 and Oct 20, 2021. That equates to a new daily average of 1,421 deaths. **The 2021 daily rate is 16.9% greater than 2020. In the math world we would say the plan has failed.**

The following is an analysis of breakthrough cases and deaths in Maryland, Massachusetts and Pennsylvania. Covid-19 breakthrough cases or deaths are in fully vaccinated persons. Each state records their Covid-19 data differently which makes some data more readily available. It is practically impossible to get all the data for these states on the exact same dates.

From the [Maryland.gov website](#) we are told.

Then it states later,

Less than 0.71% sounds pretty low doesn't it? The state of Maryland implies the vaccines are doing their job as Dr. Fauci has told us over and over again. Yet what is the trend?

Between Sept 22, 2021, and Oct 10, 2021, Maryland had an additional 21,864 Covid-19 cases which 7,233 or 33.1% of the cases were classified as breakthrough cases. Why doesn't the state of Maryland give you this data versus the 0.71% number?

During this same period, Maryland lost 259 citizens to Covid-19. Of those 259 souls, 77 or 29.7% were fully vaccinated. Again, why does Maryland.gov water down that data?

In Massachusetts, for the four week ending period of Aug 28 through Sep 18, there were 44,773 Covid-19 cases which 37.1% were classified as breakthrough and 269 covid-19 deaths of which, 86 or 32.0% were in fully vaccinated people. For the four week ending period of Sep 25 through

Oct 16, there were 38,228 Covid-19 cases which 40.8% were classified as breakthrough and 380 Covid-19 deaths of which, 154 or 40.5% were in fully vaccinated people.

These trends detail an obvious failure of the vaccine, but news outlets state that this fully vaccinated death count of 371 is only a very small percentage of the total vaccinated. What should be troubling to the Massachusetts public is those fully vaccinated account for an average of 39.2% of all deaths in the first two weeks of October.

In Pennsylvania, the acting Sec. of Health Alison Beam stated at a news conference at Lancaster General Hospital, “With nearly seven million Pennsylvanians fully vaccinated, the data makes it clear: the vaccines are safe and effective at preventing severe illness from Covid-19.”

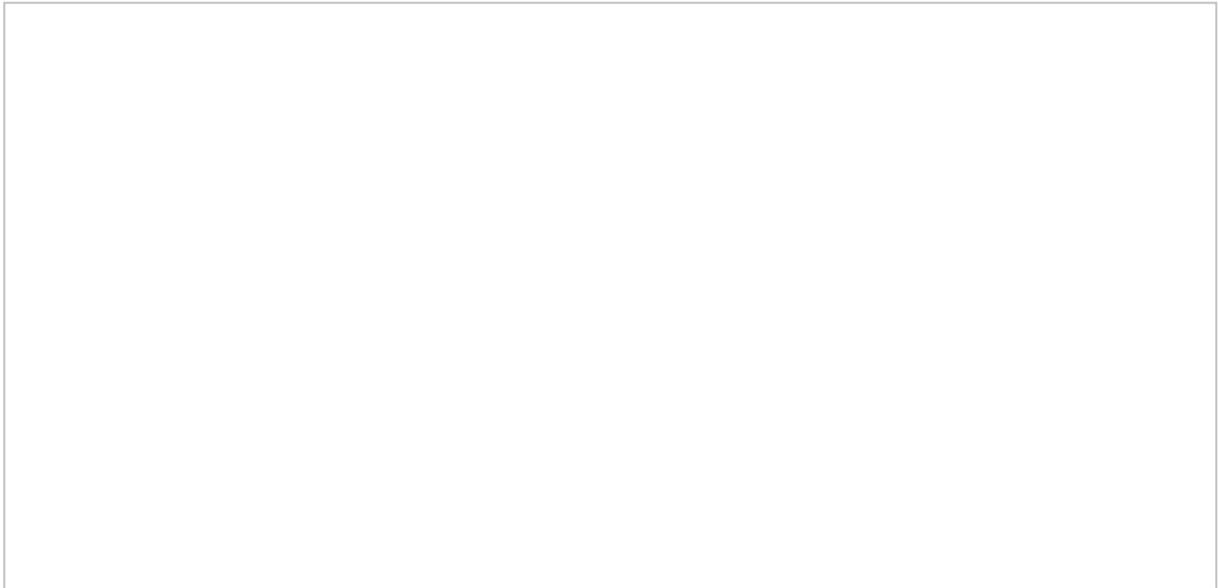

However, recent analysis of cases and deaths between September 15 and Oct 4 show that in 132k cases, 26.1% of them were classified as breakthrough and 305 (26.5%) deaths out of a total of 1,153 were in fully vaccinated people. But Sec. of Health Alison Beam makes no mention of that.

While Vermont is a small state, the fully vaccinated share of the total loss of life from Covid-19 is an even higher percentage than any of the states reviewed so far. In September, according to the **Vermont Daily Chronicle**, 76% of those who died of Covid-19 were fully vaccinated.

When we look to the UK, the picture looks as bad as in Vermont except on a larger scale which should be a concern as our country’s numbers tend to lag the UK’s by a few weeks.

The following table **from the UK government** can be found here, on page 15. It shows that between week 37 and week 40, there was a total of

2,805 covid-19 deaths and 2,136 or 76.1% were fully vaccinated. These deaths happened within 28 days of a positive Covid-19 test.

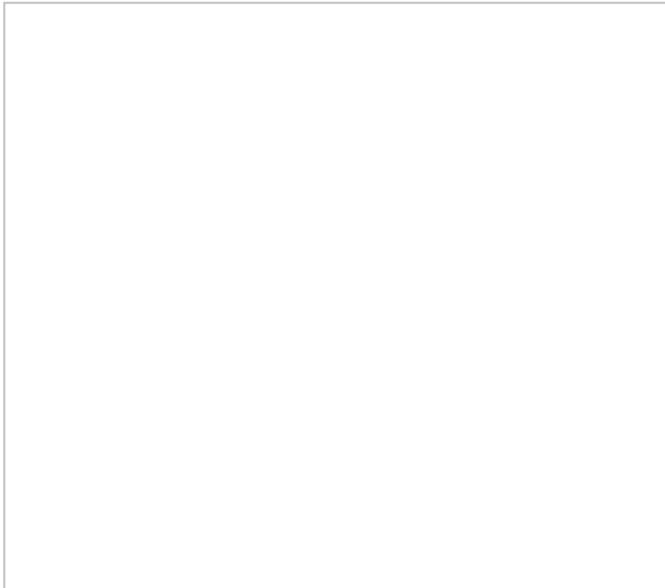

Recently, Dr. Robert Malone, who developed the mRNA technology, was interviewed on The Jimmy Dore Show and stated, “overuse of vaccines will drive the development of viruses that are able to evade vaccinations”.

Vaccinating those that aren’t at risk drives this development of further variants which could be killing more of our elderly.

Hopefully, we can learn from these trending hardships in the UK, that a booster shot that was designed for the initial variant discovered in the fall of 2019 can’t be the silver bullet against the variants in the 2021/2022 Covid-19 season. When will we realize that statements like, “we can vaccinate ourselves out of a pandemic”, could actually be very dangerous to our young and killing our elderly?

Why is our 2021 daily death toll, with vaccine use, 16.9% greater than in 2020 when no vaccine was readily available?

The **following Virginia data** was obtained.

If a current protocol has failed, we need to discard it. If the majority of deaths are in a specific age group we need to focus on that age group and protect their lives. We need to stop spending time on scare tactics with other groups who are at minimal risk of death, by coercing them or mandating them into getting an experimental vaccine without knowledge of long-term side effects.

The old saying, “knowledge is power, get some” is more relevant than ever now. Math is a beautiful thing.

With covid now being endemic, why are vaccines being pushed???

pharma \$\$\$

Probably because COVID has displaced cancer as the second leading cause of death in the US and vaccines have proved useful in avoiding both hospitalization and death. Hey, I approve of DeSantis' objections to mandated vaccinations. The problem, as I see it, is the government is taking my money thru taxation or inflation to support "free" vaccinations and "free" treatment. Put the burden back on the individual and let them roll the dice between a \$72 vaccination pair or a \$3,200 antibody treatment. In your case, keep your money (and invest in pharma stocks) and let your kid risk up the medication.

Cool disinformation, bro.

Probably because failure to treat covid in the community has resulted in hundreds of thousands of deaths.

fify

We got covid, treated early at home, and recovered within 24 hours. That's "safe and effective"

EFFECTIVE .

Doctors are more likely to want to do phone in visit rather than face to face with Vaccinated people. I wonder why?

Show more

Reply

felmmando » **apachetears** Oct 24

Perhaps because the overwhelming majority of physicians are vaccinated?

So what about people who make an autonomous

So what about people who make an autonomous, conscientious choice to get vaccinated? I wonder what profession(s) they are concentrated in.

Here's the three things I think I've learned from the Covid experience.

The injections are being given incorrectly. All the manufactures recommend aspiration before you get the injection retract the plunger if you see blood you're doing it wrong.

That the Covid vaccine degrades your immune system every time you're vaccinated.

The last thing the vaccine with more use appears to On its way to become useless.

meaning boosters make it worse not better.

So these are not really vaccines then, are they? Because if they are vaccines, and this is an actual pandemic, then why is our entire government + all their gov. employees, SCOTUS, all the "vaccine"companies' employees, and, all illegal immigrants now living among us in our communities EXEMPT from the covid passport mandates? smh

Probably got angry pushback, made their rules look very suspicious, so they created this update. My point still stands because the original exemptions proved this was a scam.

The not-vaccines do not work and the governmnet and media are lying about just what is or is not a "covid" death.

Dave Fordham  Oct 24 Edited

The problem is that if we have to find out the hard way, it means millions of deaths directly as a result of the vaccine which can't be hidden or covered up. That means family members, friends, siblings and the like. I haven't gone for it but my entire family has so basically it's all in the air. I want this madness to stop but I also know that it will come at a great cost if it comes at all. And this terrible dichotomy is with all people who can see through the charade.

The flu virus , which it is, was not a problem, the fatality rate was the same as the seasonal flu. Lies by governments created a problem and now experimental drugs have been taken by millions of people with very small brains and irrational fears...

Sadly, many Americans refuse to do their own research to see what these mandated shots actually contain. I have researched online, even watched videos of people receiving the shot; children, young people, pregnant moms, older people, who were in perfect health...collapse or die right after being injected with this experimental "genetherapy" which is deadly for many, already killed thousands, caused miscarriages, massive strokes, heart attacks, paralyzed, sterilized and caused

Pretty sure they already have. The Stand comes to mind. Contagion. Pandemic. Outbreak. Virus. Except for the zombie element in one of these, I'm sure they probably got some of it right. The best of all, though, had to be Event 201, the only non-fiction one among them. 😊
