Alex Jones of **Infowars** made a special broadcast on Monday night regarding an explosive video of Fauci with HHS officials and other health experts discussing how to enforce Universal Flu Vaccination in a summit organized by Milken Institute in Washington, DC last October 2019.

Alex Jones highlighted three clips from the hour-long video of the summit from **C-SPAN** which proved the COVID-19 pandemic was planned and the

x

Big Pharma worked with the UN and other corrupt government officials to develop and release the COVID-19 virus ahead of 'Great Reset'.

The first clip featured Michael Specter, a journalist from The New Yorker and also an adjunct professor of bioengineering at Stanford University, Anthony Fauci, the director of the National Institute of Allergy and Infectious Diseases, and Rick Bright, the director of HHS Biomedical Advanced Research and Development Authority (BARDA).

In this video, they conceptualized having a new outbreak of novel avian flu virus from China so they can bypass the method of FDA approval and enforce mRNA vaccine to the masses.

Here's the transcript:

Michael Specter: *Why don't we blow the system up? I mean obviously, we can't just turn off the spigot on the system. We have and then say, hey everyone in the world should get this new vaccine that we haven't given to anyone yet. But there must be some way that we grow vaccines mostly in eggs the way we did in 1947.*

Fauci: *In order to make the transition from getting out of the tried-and-true egg growing which we know gives us results that can be beneficial, I mean we've done well with that. There must be something that has to be much better. You have to prove that this works and then you've got to go through all of the clinical trials: phase 1, phase 2, phase 3, and then show that this particular product is going to be good over a period of years. That alone, if it works perfectly, it's going to take a decade.*

Bright: *There might be a need or even an urgent call for an entity of excitement out there that's completely disruptive, that's not beholden to bureaucratic strings and processes.*

Fauci: *So we really do have a problem of how the world perceives influenza and it's going to be very difficult to change that unless you do it from within and say, I don't care what your perception is, we're going to address the problem in a disruptive and in an iterative way because she does need both.*

Bright: *But it is not too crazy to think that an outbreak of novel avian virus could occur in China somewhere. We could get the RNA sequence from that.. to a number of regional centers if not local, if not even in your home at some point, and print those vaccines on a patch of self-administer.*

Watch the clip (full video below):

More from **Medical Kidnap**:

Joining Fauci, Rick Bright, and Michael Specter at this event were: Margaret Hamburg, Foreign Secretary, National Academy of Medicine, Bruce Gellin, President, Global Immunization, Sabin Vaccine Institute, Casey Wright, CEO, FluLab.

*In short, this panel discussion focused on what they perceived as the need for a universal flu vaccine, but they admitted that the old way of producing vaccines was not sufficient for their purposes, and that **they needed some kind of global event where many people were dying to be able to roll out a new mRNA vaccine to be tested on the public.***

They all agreed that the annual flu virus was not scary enough to create an event that would convince people to get a universal vaccine. And as we now know today, about 2 years after this event, that “terrifying virus” that was introduced was the COVID-19 Sars virus.

And so now we know why the flu just “disappeared” in the 2020-21 flu season. It was simply replaced by COVID-19, in a worldwide cleverly planned “pandemic” to roll out the world’s first universal mRNA vaccines.

This was always the goal, and previous efforts through various influenzas, AIDS, Ebola, and other “viruses” were all unsuccessful in leading to the development of a universal vaccine to inject into the entire world’s population.

Margaret Hamburg stated regarding getting a “Universal Vaccine” into the market: “It’s time to stop talking, and it’s time to act... I think it is also because we haven’t had a sense of urgency.”

Michael Specter asked: “Do we need lots of people to die for that sense of urgency to occur?”

Hamburg replied that: “There are already lots of people dying” from the flu each year.

Bruce Gellin stated that basically people just are not afraid enough of the term “the flu.”

There are so many things that are revealed about how Big Pharma and government health authorities think in this panel discussion. For example, they bemoan the fact that if they do too good of a job in public health, then they lose funding to develop products that fight viruses.

Michael Specter states: "It seems to me that one of the curses of the public health world is, if you guys do your job well, everyone goes along well and healthy."

Hamburg: "And they cut your funding."

Rick Bright complains that the yearly distribution of flu vaccines is inefficient in terms of collecting data, and in the process actually admits that some vaccines just don't work well:

"We distribute 150 million doses of the seasonal (flu) vaccines every year, we don't even know how many people are being vaccinated from the doses that are delivered to the people, which doses they got, and what the real outcome was, so that we can learn from that knowledge base on how to optimize or improve our vaccine. So there are opportunities that we have today..

I think if we uncloaked the poorest performing vaccines in the market place today, it might be very revealing to tell us which of the technologies we have, and allow us to go deeper into those technologies to determine why they are more effective. There are vaccines licenses today that are more effective. I think that we're just afraid to admit the truth."

I am grateful to whomever transcribed this. I had previously shown it to many and I don't think they heard some of the nuances of the conversation, but still were absolutely alarmed.

The transcription is a kick in the face to anyone who may be questioning why the propaganda and pushing an untested drug so hard. People really snap out of their malaise quickly. Keep sharing!!! Information is power.

'Horse Paste' or a yearly flu vaccine? I'll take Mr. Ed's Ivermectin, before I'd ever take another vaccine.

It's long been suspected that vaccines have caused the dramatic rise in autism, now let's do Sudden Infant Death Syndrome.

The Chief Scientist Nov 3

Stop with the Horse Paste nonsense Ivermectin is FDA approved for human use. It is anti-parasite , anti-inflammatory and anti-viral.

The fact that all these people on that stage and attending that conference weren't long ago arrested and sent by a judge to dangle by the neck on a rope tells me all I need to know about the justice systems in the West. We see here Mengele and his friends planning on doing the same thing all over again and being protected by those running the MSM all over again while they do so. All of these Western "justice systems" and MSM agencies are complicit in evil..

Why did this article/video get removed so quickly from Gateway Pundits front page so quickly? That video should be circulated everywhere.
