

## MUST WATCH! Glenn Beck On Tucker Carlson: NIH Claimed Joint Ownership Of Moderna mRNA Vaccine, Began Development WEEKS Ahead Of Pandemic

(TeaParty.org Exclusive) – A new report from Infowars says that the US National Institutes of Health actually worked alongside biotechnology company Moderna to come up with a coronavirus mRNA vaccine **weeks before** the COVID-19 outbreak even started.

Folks, this is direct evidence that this whole pandemic might have been planned from the very beginning. Why would our government and these biotech companies do something like this? Well, for one, the pandemic is producing a lot of cash for those creating vaccines. And it also provides the government with justification for more and more authoritarianism.

“Appearing Wednesday on Tucker Carlson Tonight, radio host Glenn Beck broke down the astonishing revelations, claiming key members of the federal government quietly entered into a joint ownership of Moderna’s mRNA vaccine just as the pandemic was poised to hit the US,” the Infowars report said.

Here’s a transcript of Beck’s breakdown where he pointed out detailed key passages in a private confidential agreement between Moderna and the NIH, made weeks before the outbreak of the virus here in the United States.

“Gain-of-function, which Fauci says never happened, happened in November of 2015. It happened with Dr. Baric. It was a published paper

November 2015. The USAID and Fauci, with EcoHealth, they were funding it, it was happening with the Wuhan people. So we know that, but what you may not know is in November, the same month that published paper comes out, the United States begins a partnership with Moderna, and they are searching for mRNA coronavirus vaccines. Kind of a weird coincidence, but wait it gets worse," Beck said.

"In this time, we skip to 2018, DARPA receives a proposal from Dr. Baric, the US guy, Dr. Shi from Wuhan (pictured [here](#)) and Peter from EcoHealth, and DARPA sees this and says, 'This is far too dangerous. We're rejecting your proposal,'" the conservative powerhouse continued.

"We don't know what happened from there, but we do know just about 12 months later in Wuhan – where Peter Daszak, Dr. Shi, the bat lady, and Dr. Baric were all doing research on coronaviruses – about a year later, there's an outbreak, and the outbreak actually begins according to documents that we have that have been smuggled out of China that there were 10 hospitals involved by October with patients that were now, we now know, are corona-like virus symptoms. They didn't know what was going on," Beck said, adding, "Now, that was in October."

"Remember, we didn't know anything about this in December, we were starting to get rumblings. China said there was some sort of an outbreak on December 31st, but... Dr. Baric signs a government deal with Moderna, I'm gonna read it exactly to you... this deal was made... it's confidential... it's a hundred and, I don't know, 58 pages-long... If I skip to page 104, they are entering a specific private confidential agreement. The NIH appears to be transferring technology to Dr. Baric, but what they're making clear is quote "mRNA coronavirus vaccine candidates developed and jointly owned by NIAID and Moderna," Beck told Tucker.

Beck continued his breakdown saying, "Now this is weird, because it's two weeks later that we know there's a problem. They sign that deal two weeks before, and they sign it with the doctor who happened to be a partner with the bat lady in Wuhan."

"Here's where it gets really dark. These are the same group of people that in the end of January begin to have meetings and they shut down and begin to smear anyone who's looking into the lab leak theory. They establish that's not true, don't even look there," Beck stated.

“It appears to be collusion. You know we’ve passed this on to several people in Congress and the Senate. We know Rand Paul is on this and Dr. Fauci has some answers to give,” Beck concluded.

This isn’t the first evidence that’s been produced that shows there was some sort of planning for a coronavirus pandemic happening before the proverbial crap hit the fan.

A [report](#) from Gateway Pundit back in February discusses how U.S. Dr. Ralph Baric was actually reviewing Moderna and Dr. Fauci’s coronavirus vaccine as far back as December 2019!

“On April 9, 2020, we were the first media outlet to report on major events leading up to the China coronavirus leak that we suspected came from the Wuhan Institute of Virology. We were able to determine Chinese Doctor Shi Zhengli was part of a team that was working on a coronavirus project jointly with US doctors in 2014 before it was shut down by the DHS for being too risky,” the report said.

After the U.S. research project was officially closed down, Dr. She then went to Wuhan, China, where she continued her research into the coronavirus.

Dr. Shi Zhengli, from China was part of a team, which also consisted of Dr. Ralph Baric from North Carolina, that published an article back in the 2015 edition of a publication known as Nature Medicine.

In this particular article, they talked about bat coronaviruses which showed the potential for possible human emergence. Again, that was published in 2015, years before the pandemic ([screen shot here](#)).

This report was penned not long after the project was defunded by the U.S. Department of Health and Human Services. In a letter that was sent from the HHS back in 2014 to the University of North Carolina at Chapel Hill, announced they would be going forward with defunding the program. Dr. Ralph S. Baric was personally identified in that letter.

“After the work stopped in the US, the Chinese moved forward with the project and ran research and development in Wuhan at the Wuhan Virology Center. From Shi Zhengli’s papers and resume, it is clear that

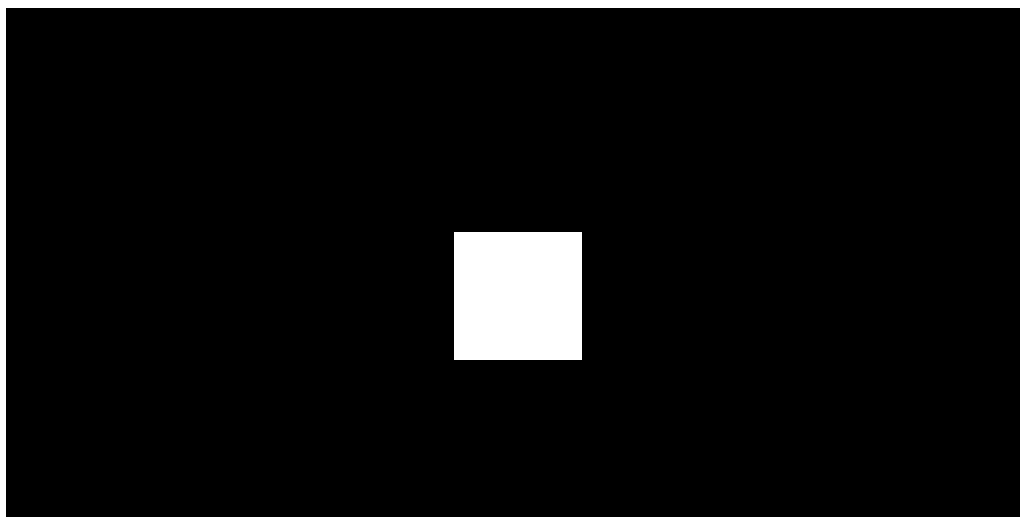

they successfully isolated the virus in the lab and were actively experimenting with species <-> species transmission," the report said.

"Today, Dr. Lawrence Sellin, who contributed much to this effort to uncover the truth about COVID, reported that a December 12, 2019 agreement was signed by Dr. Ralph Baric that he would receive the "mRNA coronavirus vaccine candidates developed and jointly-owned by NIAID and Moderna." the February report stated.

"The Moderna mRNA vaccine is now being given to people around the world. Pfizer also has an mRNA vaccine. Ralph Baric is a long-time coronavirus researcher with close ties with the batwoman and the Wuhan Institute of Virology as noted above in our post from April 2020. December 12, 2019, is very early in the COVID-19 outbreak before it was reported in the West. Baric would be a logical person to test the efficacy of an mRNA vaccine," GP said.

Basically, what this is telling us is that both Dr. Baric and Fauci might actually have been aware of what was going on in China, and Fauci was likely working with Moderna to create vaccines for the coronavirus well before the illness was announced in the West. The Moderna version of the vaccine was ready for human testing very quickly.

This might not be a smoking gun kind of thing, but it is definitely interesting and raises a whole lot of questions that need answers.
