Viral video has emerged showing a whistleblower nurse raising alarm over an email from an insurance provider detailing how a medical tracking code – used by physicians and healthcare providers to diagnose patients – will distinguish people who decline the Covid jab because of an “unspecified reason.”

“'[ICD 10 Code:] Z28.20, immunization not carried out because of the patient’s decision for an unspecified reason,’” says the nurse reciting the Email. “This new code will allow us to follow vaccine counseling visits & take more steps to vaccinate.”

“For those of you who don’t know, an ICD 10 code is your diagnoses code – it flags your insurance, it flags anytime anybody goes looking through codes, CMS, Medicare,” the nurse tells the viewer. “They type in a code, and anybody who’s been diagnosed with that code comes up on a list.”

She concludes by warning how ascribing such a code to people can enable a database that can be used to corral the unvaccinated into “camps.”

MSM Admits COVID Vaxx Useless, Pushes for Medical Tyranny Lockdown
