As of the end of October, the miracle vaccine that was supposed to save us all : normal lives has killed (<https://openvaers.com/covid-data>) over 17,619 Americans, 86,542 to the hospital, at least according to the US government official website things. If things continue at this rate, we will see over 22,000 deaths by the end be pointed out that these numbers are actually low-end estimates. Before we get though, how do these numbers compare to other vaccines? Maybe these are just expected.

The Vaccine Adverse Events Reporting System (VAERS) is used for all vaccines, vaccines. It was started in 1990 to provide a way to track and identify early incidents with vaccines. In the 32 years of its existence, there have been a total of 26,680 all vaccines, or 9,061 total deaths from all other vaccines besides the Covid vaccine 280 deaths per year for all other vaccines combined. Given that there are now vaccines tracked in the database, the number of deaths attributable to any vaccine except for the Covid vaccines.

Not even a year

In just ten months, the number of deaths attributable to the Covid vaccines is : annual number for all other vaccines. By the end of the year, that factor will lik times. Does this bother anyone?

Trending: James O’Keefe: “10 FBI Agents... handcuffed me and threw me agains partially clothed in front of my neighbors.” [VIDEO] (https://100percentfedup.c 10-fbi-agents-handcuffed-me-and-threw-me-against-the-hallway-partially-c my-neighbors-video/)

Vaccine proponents, including from within our own government, have attempt discredit these numbers. They often claim that since the VAERS system is volu sorts of false reports in the system so the numbers are unreliable. Aside from t VAERS report is time-consuming and requires filling out a rather extensive for false report:

“Knowingly filing a false VAERS report is a violation of Federal law (18 U.S. Code by fine and imprisonment.”

(<https://www.mypillow.com/fedup/>)

As a consequence, it is unlikely that any significant number of VAERS reports a death reports which can be traced back to actual death certificates. Attempts 1 data constitute misinformation.

How dangerous is it?

I suggested that the numbers reported in VAERS might actually be low-end estimates (<https://openvaers.com/images/r18hs017045-lazarus-final-report-20116.pdf>), assess the effectiveness of the VAERS system. The conclusion was that since the system is voluntary, the number of events reported significantly undercounted the actual number. According to the report, fewer than 1% of adverse events are reported. That means the actual number of events, including deaths and hospitalizations could be 100 times or more than reported.

The CDC reports (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/>) that as of October 27, there have been 740,348 Covid deaths in the US. If the number of vaccine deaths is just 40 times that of the number of VAERS deaths reported, the total count would be equal to the total number of reported Covid deaths. In other words, dying from the vaccine is likely equal to or greater than that of dying from the

The situation is not limited to the US. The UK has a system similar to VAERS called the Yellow Card system. The UK publishes a periodic report (<https://www.gov.uk/government/publications/coronavirus-covid-19-vaccine-reactions/coronavirus-vaccine-summary-of-yellow-card-reporting>) of vaccine reactions. They repeatedly point out that adverse reactions might be merely coincidental to the vaccine, but such disclaimers appear to be politically required. While reports are somewhat different from those of the US, at least one researcher found that the number of Covid vaccine deaths was 28 times (<https://ukfreedomproject.org/covid-19-vaccines-analysis/>) higher than for the flu vaccines.

Comparable results turn up worldwide from Israel – one of the most jabbed countries to Ireland and wherever the vaccines are used. It is often difficult, though, to gauge vaccine-associated deaths. One reason is that the death may occur hours to days so that it is difficult to attribute the death to the vaccine. Of greater concern is a deliberate blackout of reporting on adverse reactions to the Covid vaccine.

Is it worth it?

The vaccine advocates like to talk about how the unvaccinated are two, five, ten times more likely to get severe Covid symptoms or even die. But where do these numbers originate?

The problem lies with the high recovery rates of Covid infections. The difference between vaccinated and unvaccinated is small – around 99.7% vs 99.5%. What this means is that if on a million confirmed cases each for vaccinated and unvaccinated, 3 vaccinated will die, while 5 unvaccinated would suggest that there is a 5/3 advantage for vaccination. However, take two million, 1,000 each, and you might get 2 vaccinated deaths and 3 unvaccinated, or 6 vaccinated and 5 unvaccinated. To get reliable statistics and good estimates of efficacy, one might need to get a million in each group. For high survival rate situations, there is large uncertainty in estimates unless very large numbers of samples are collected.

Until the most recent months, there weren't enough vaccinated to make good estimates.

Now, though, things have changed, including most of the assumptions and methods that support the initial vaccine arguments. As I pointed out in a previous [article](https://thebluestateconservative.com/2021/09/11/making-sense-of-covid-c-delta-and-demographics/) (<https://thebluestateconservative.com/2021/09/11/making-sense-of-covid-c-delta-and-demographics/>), before June, the dominant variant was the Alpha version of the virus. Since June (<https://ourworldindata.org/explorers/coronavirus-to-selection=true&time=2020-03-01..latest&facet=none&pickerSort=asc&pickerMetric=location&Metric=Delta+variant>), the Delta variant has taken over. Prior to June, there were relatively few people of the cases were in the unvaxxed.

The vaccines that were tailored for the original Covid variant were no longer viable for the new Delta form. Deaths from infections were greatly reduced because people had effective therapies such as Ivermectin, despite FDA disapproval. Significantly, fewer people started showing up with “breakthrough” cases in numbers growing to exceed those of the unvaxxed. Deaths for the vaxxed also climbed to exceed those of the unvaxxed.

The official story

CDC and others are still claiming vaccines work and are superior to the natural immunity from recovery. A recent [study](https://www.cdc.gov/mmwr/volumes/70/wr/mm7011a1.pdf) (<https://www.cdc.gov/mmwr/volumes/70/wr/mm7011a1.pdf>) cited in a recent CDC release maintains that vaccines are over twice as effective as natural immunity, although in the discussion section, the authors point out a few of several pieces of research that might lead to significantly different results. One issue is that most of the data is from prior to June when vaccines were actually working to some degree.

The CDC has been playing with the statistics for a long time. From March of 2020, it mandated that all death reports where Covid was present or suspected be reported as a Covid death, to most recent manipulations of vaccine efficacy and breakthrough infections. The CDC has been providing misinformation and even disinformation to support vaccination. For example, on its [webpage \(https://www.cdc.gov/coronavirus/2019-ncov/vaccines/adverse-events.html\)](https://www.cdc.gov/coronavirus/2019-ncov/vaccines/adverse-events.html) describing adverse events, it calculates the rate of vaccination deaths as the number of doses.

But people die, not doses, and the vaccines require people to get two doses for some, sometimes three or more. Consequently, the rate they calculate is probably less than the actual rate. Further, they report only 9,000 deaths resulting from vaccination, while there were 17,000 in the same period. They claim to use the same data, but for some reason only report almost half the relevant deaths.

All this serves to make it appear that vaccination deaths are less common than they actually are. They even call the 9,000+ deaths “rare” even though that number of deaths alone is greater than the total annual deaths from all other vaccines.

To add insult to injury, the use of an experimental drug requires that any recipient be provided with full information regarding known or suspected side effects and risks. This is called “informed consent”. The official CDC [guidance \(https://www.cdc.gov/coronavirus/2019-ncov/vaccines/pdfs/321466-A-FS-What-Expect-COVID-19-Vax-Final-12.13.20.pdf\)](https://www.cdc.gov/coronavirus/2019-ncov/vaccines/pdfs/321466-A-FS-What-Expect-COVID-19-Vax-Final-12.13.20.pdf) does not even list the most serious adverse reactions observed. Instead, it minimizes any side effects as “rare”.

Moreover, when discussing legal requirements for informed consent, a CDC [webpage \(https://www.cdc.gov/vaccines/imz-managers/laws/index.html\)](https://www.cdc.gov/vaccines/imz-managers/laws/index.html) explicitly states:

“There is no Federal requirement for informed consent relating to immunization.”

However, there are Federal laws   (<https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?> require informed consent as part of the Emergency Use Authorization given by Covid vaccines. This statement by the CDC must be considered disinformation and deceive the public.

Are the vaxxed safe?

Many who received the vaccines and who survived the experience consider them safe. Not so!

There is an effect (<https://link.springer.com/article/10.1007/s40259-021-0049-9>; Vaccine-Associated Enhanced Viral Disease (VAED). At least two pathologies fall under this category: Antibody-Dependent Enhancement (ADE), and Vaccine-Associated Hypersensitivity (VAH) of concern with the Covid vaccines.

ADE reactions can be severe, even to the point of death. Essentially, the vaccine system overreacts to a subsequent infection. The infection does not have to be the one to which the vaccine is directed. ADE has been suggested as the mechanism for the breakthrough infections that are currently being observed.

VAH has been observed with measles vaccines, and may also be present after receiving Covid vaccines. Like ADE, this condition may also be fatal and may occur at some point in the future, including months or even years after vaccination. The disruption of the immune system by the vaccines is long-lasting even if their effectiveness against the original pathogen is high.

Two recent articles here (<https://theexpose.uk/2021/10/27/fully-vaccinated-die-than-unvaccinated/>) and here (<https://theexpose.uk/2021/10/26/the-uk-data-does-not-support-the-claims-made-for-covid-19-vaccine-safety-effectiveness/>) presented an analysis of data from the UK system that suggested that if the vaccines were ineffective, they actually had negative efficacy values, meaning that vaccinated people were more susceptible to infection and more likely to die than unvaccinated.

You must be kidding me.

During the recent FDA hearings to consider approval of the Covid vaccines for least one of the participants essentially said that we don't really know what effects have on children, so we should approve their use for children so we can find out let's turn our children into lab rats and experiment on them just like we did on

Who benefits?

This could also be called "follow the money", although money is not the only reason for vaccine mandates. The companies producing the vaccines, especially including Pfizer, benefitted not only from direct sales of their vaccines but also from increased stock prices resulting from investor recognition of the value of a large and captive market for their products. Various authorities have enjoyed large increases in their power by being able to perform authoritarian acts as necessary to public health. Some have even exploited the pandemic to transform or eliminate fundamental freedoms throughout society, bringing the process of social control closer to fruition.

What now?

It is imperative that if we wish to retain the freedoms we have enjoyed until recently, we must resist the vaccine mandates, the vaccine passports, the inhumane treatment of those who refuse vaccination, and the dehumanization of objectors. It should be clear from this and from others across the world, that the current push for mass vaccinations has little to do with public health, and everything to do with power and money. There are few good reasons for the current push for vaccinations and many bad ones.

In typical authoritarian fashion, Mr. Biden says he is losing patience with people who do not get vaccinated. I would say that we the people are losing patience with Mr. Biden. It is time to just say "no".

Let's Go, Brandon.

I agree, Those unvaccinated should stay that way. I am vaccinated and admit I am sorry I got the jab. I am tired of the Biden Administration putting the fear of God into people. This is one way of keeping things truly happening. There are more deaths from the vaccinated than from the unvaxed. There should be no mandates. The Administration has overreached with its mandates. It is our bodies and we should not be forced to bring us harm. IT IS THE PEOPLE'S CHOICE not the governments.

9 ^ | v • Reply • Share >

Tom Taylor → Dot Gill • 3 days ago • edited

The number of actual COVID cases far exceeds the number of confirmed cases as reported by January of 2020 with a headache for 3 days. This is before anyone knew what it was. Unfortunately, many have been vaccinated and some have died despite unknowingly having already acquired a natural immunity.

2 ^ | v • Reply • Share >

Dot Gill → Tom Taylor • 3 days ago

Tom, I may be wrong, but I equate this so called pandemic as one having a case of viral infection with no vaccines, but people survived it anyway. This is to do with politics not worrying about anything the radicals care about is money and power.
