Top NIH Unvaxxed Scientist Willing to Lose Job and License, Will Argue Against Vaccine Mandates in Livestreamed Ethics Review

A senior bioethicist and director of the Laboratory of Infectious Diseases at the National Institutes of Health — who said he's willing to risk his medical license — will argue against vaccine mandates during a Dec. 1 livestreamed roundtable.

By [Megan Redshaw](#)

115

Miss a day, miss a lot. [Subscribe to The Defender's Top News of the Day. It's free.](#)

A senior bioethicist who heads a research team at the National Institute of Allergy and Infectious Diseases (NIAID) is [taking the lead](#) at the National Institutes of Health (NIH) in the debate over the ethics of [COVID vaccine mandates](#).

[Dr. Matthew Memoli](#), director of the Laboratory of Infectious Diseases at NIH, will argue against [vaccine mandates](#) during a Dec. 1 livestreamed roundtable session, which will be open to the public.

"There's a lot of debate within the NIH about whether [a vaccine mandate] is appropriate," David Wendler, a senior NIH bioethicist in charge of planning the session, [told the WSJ](#). "It's an important, hot topic."

Memoli opposes mandates for the [COVID vaccines](#) authorized for emergency use in the U.S., and has chosen not to be vaccinated.

ORDER TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

Memoli sought a religious exemption from the mandatory vaccine requirements imposed by health authorities in the District of Columbia, where he is licensed to practice medicine.

Memoli said he is willing to risk his job and his license for the right not to receive a COVID vaccine. During the scheduled roundtable early next month, he will make the case against mandates.

"I think the way we are using the vaccines is wrong," Memoli said in a July 30 email to [Dr. Anthony Fauci](#), director of the NIAID, and two of his lieutenants. Memoli called mandated vaccination "extraordinarily problematic."

Memoli [told the WSJ](#) one of Fauci's colleagues thanked him for his email. Memoli said he supports COVID vaccines for high-risk populations including the elderly and obese, but said, "blanket vaccination of people at low risk of severe illness could hamper the development of more-robust immunity gained across a population from infection."

Memoli, a 16-year veteran at the NIH was selected this month for a 2021 NIH director's award — a top recognition from the head of the agency, for his supervision of a national study into undiagnosed COVID cases early in the pandemic.

Memoli said his children have [received their childhood vaccines](#), and he will support the results of the ethics discussion regardless of the outcome.

"I do vaccine trials. I, in fact, help create vaccines," Memoli told the WSJ. "Part of my career is to share my expert opinions, right or wrong ... I mean, if they all end up saying I'm wrong, that's fine. I want to have the discussion."

Christine Grady, head of NIH's Clinical Center bioethics department and Fauci's wife, approved the Dec. 1 seminar — a session called "Grand Rounds."

Grady said in an email she believes there is interest in the topic across the agency.

"Our hope is that the December Grand Rounds will be relevant to the debates that are going on around the country regarding vaccine mandates," an agency spokeswoman said on Grady's behalf.

Federal appeals court temporarily halts Biden's COVID vaccine mandate for private employers

A federal appeals court on Saturday [issued a stay](#) temporarily halting the Biden administration's private-employer COVID vaccine mandate, citing, "grave statutory and constitutional" issues with the requirement.

"Because the petitions give cause to believe there are grave statutory and constitutional issues with the mandate, the mandate is hereby stayed pending further action by this court," the U.S. Court of Appeals for the Fifth Circuit said in the order.

The [case was brought](#) by multiple businesses and several states, including Texas, Utah, Louisiana, South Carolina and Mississippi. They argued the [requirements](#) exceed the authority of the Occupational Safety and Health Administration (OSHA), which will enforce the mandates, and amount to an unconstitutional delegation of power to the executive branch by Congress.

The Biden administration on Monday asked the federal court to lift the order [blocking the mandate](#) for large private employers. The administration said the petitioners were not claiming a "major prospect of harm" from the rule, so the court should allow the mandate to proceed while the case makes its way through the system.

"Accordingly, there is no need to address petitioners' stay motions now, and the court should lift its administrative stay and allow this matter to proceed under the process that Congress set forth for judicial review of OSHA standards," lawyers for the administration argued.

The White House on Monday said businesses should move forward with Biden's vaccine mandate for private businesses, despite a federal court order temporarily halting the rules, [CNBC reported](#).

"People should not wait," White House Deputy Press Sec. Karine Jean-Pierre told reporters during a [press briefing](#). "They should continue to move forward and make sure they're getting their workplace vaccinated."

The [OSHA regulation](#) applies to employers with at least 100 workers, creating an emergency temporary rule that will require employers to mandate workers be vaccinated against COVID or submit to regular testing. A deadline for companies to comply with the regulation was set for Jan. 4.

Petitioners said the [mandate](#), publicized as an emergency temporary standard by OSHA, [should be struck down](#) because it exceeds OSHA's authority under the [Occupational Safety and Health Act](#).

More than [two dozen states](#) have filed lawsuits against the Biden administration over the vaccine mandate for large private employers in the 5th, 6th, 7th, 8th, 11th and D.C. Circuits. Federal law dictates cases be consolidated and heard by one federal appeals court chosen by a lottery.

According to the U.S. Department of Justice, the lottery could take place on or around Nov. 16, and the case could make its way to the Supreme Court.

Hmm. The fact that this roundtable is being arranged by Fauci's wife makes me doubt that any real controversy will come to light. Perhaps this Matthew Memoli is playing the part of controlled opposition.

101 ^ | v 1 • Reply • Share >

JP Buell → Susan C Roberts • 2 days ago

I agree with you Susan! It sounds pretty hokey to me, too.

29 ^ | v • Reply • Share >

JMarie → Susan C Roberts • 2 days ago

Ditto. If they were serious about an ethics review they should include other significant voices like Dr Peter McCullough and Dr John Ioannidis among others. Fauci's wife published a paper in 2018 on the non-compliant in the case of a pandemic and the potential use of aerosolized vaccines in public places. I'll pass on this one.

26 ^ | v 1 • Reply • Share >

Susan C Roberts → JMarie • 2 days ago

I think anyone who says the elderly can be sacrificed is way off track.

25 ^ | v 1 • Reply • Share >

Marjorie Rosenfeld → ronnie Diener • 2 days ago • edited

Anyone who says that 5 to 11 year-old children should be inoculated with these Emergency-Use genetic transfer treatments is also off track. There will be dead and injured children from this. Deaths and injuries from the so-called vaccines have now surpassed deaths and injuries from Covid. I thought we had gotten rid of Nazi experiments on unwilling subjects. It appears not.

30 ^ | v • Reply • Share >

Kellie Thoms → ronnie Diener • 2 days ago

Already been done. Remember in the beginning when covid patients were deliberately placed in nursing homes to infect the residents? How easily we forget. Holocaust, Jim Jones, Tuskegee Experiments,

marcus → ronnie Diener • a day ago

the elderly were indeed already sacrificed because they've been consistently refused in many countries to be treated early on or as a prophylaxis with Hydroxy/zinc / VitD/C or the ivermectin protocol - both would have saved millions of lives (as they have done in poor countries that were not going to get a chance of any early vaccines. letting the virus out of the Wuhan lab was almost certainly a deliberate plan to reduce the burden on many nation states who are facing a pensions/healthcare demographic timebomb. If they vaccines work, then they should protect the elderly - if they don't work, why give them to kids when there are so many adverse reactions including death? We shouldn't be sacrificing kids anyway for an entire life ahead of them for prolonging an old person's life by just a few more years before they'd die of something else anyway - that's crazy!

1 ⤵ | ⤴ • Reply • Share >

Beth Price-Almeida → marcus • a day ago

Hell, EVERYONE is being refused early treatment.

I thought government agencies were supposed to avoid nepotism.

3 ⤵ | ⤴ • Reply • Share >

Jenna → Susan C Roberts • a day ago

Yeah, it's a complete joke. Perhaps these employees should have stood up for their rights a long time ago. This guy is not a hero; he is a coward. Waited to speak up until the mandate was coming after him and his family. Too late buddy!

Notice how he's already qualifying his statements by saying he could be wrong but at least we talked about it.

If the scum want to have a circle jerk in their echo chamber let them have at it. Their mandates will be ignored.

1 ⤵ | ⤴ • Reply • Share >

Charlie → Susan C Roberts • a day ago

That totally makes sense. This will never be a real debate. They can't win a real debate.

DubbyD • 2 days ago • edited

At 83 I'm pretty healthy. I suspect that's related to my avoidance of doctors except on a "need to" basis. I don't get flu shots and I'm certainly not going to willingly accept this so-called vaccine. I wear a mask only when required to, do not use that immune suppressor liquid the stores are always shoving at people. I use public transportation, hold on to the railings, and don't hide from the sun as we have been encouraged to do. I guess the predator class doesn't want to take a chance on the sun providing any healing energy. I was very young during WW2, but I remember it. I grew up in Brooklyn, but was very aware of the evil perpetrated by the German predator class - with the

help of our own, along with the eager collaboration of the German people. I feel that we're entering the same gate to hell once again and with many of the descendants of nazi criminals and their American supporters. I feel that zyklon B has been replaced this time around with the Jim Jones Jab and people eagerly, happily, believably dancing toward their own extinction, so intellectually stilted that they are pushing their own children to today's answer to the ovens that were built and kept busy by Germany's major medical corporations. Perhaps I'll get covid and die. I've been fine so far and with a lot less, actually zero, Fauci following. As an old person, my preference would be to leave this world rather than live in a techno-fascist world. I don't think much more highly of the intelligence of the privileged predator class than I do of those who unthinkingly follow them. So I really think they will ultimately be defeated. I would hope for a world where people are encouraged to evolve beyond this hyper-materialist mindset. If we could find a way to eliminate the virus of

Dr. Kurt Blome had been in charge of Germany's biological weapons development. He was captured after the war by US Army intelligence, and admitted during subsequent interrogations to numerous medical atrocities. There was ample evidence of crimes against Blome, and he had also admitted to crimes that would have been more than enough to send him to the gallows. Nonetheless, U.S. officials intervened to get him acquitted. He was hired by U.S. Army Chemical Corps to work on chemical and biological warfare.

Blome worked for Plenipotentiary for Cancer Research, the title was deceptive: His interest was not in curing cancer, but in causing it via viruses, and in the military use of carcinogenic substances. He also headed an institute that aimed to develop biological warfare agents, whose experts advocated attacking the US with human and animal epidemic pathogens, as well as plant pests. Blome's biological warfare organization conducted lethal experiments on 1700 inmates at the Mauthausen concentration camp. His organization also collaborated with Japan's infamous Unit 731, which was carrying out even worse biological warfare experiments on the other side of the world.

Albert Einstein left Nazi Germany just months after Hitler took power and he declared that science and justice were now in the hands of a "raw and rabid mob of Nazi militia." He even tried to appeal to President Truman to stop taking in anyone who had served Hitler. And here we are with a Fourth Reich/NWO.

Thanks for your post. I've seen this and comparable data before. Would you happen to have a source for your information? Is there a book on the 'achievements' of ex-Nazis and their employers in the U.S. after WWII?

^ | v • Reply • Share >

Jennifer ➔ Tsipora Pereira • 18 hours ago

'Operation Paperclip, The Secret Intelligence Program that Brought Nazi Scientists to America,' by Annie Jacobsen and 'The Nazi Doctors, Medical Killing and the Psychology of Genocide,' by Dr. Robert Jay Lifton have much information. Another book is 'A Woman Survivor's True Story of Auschwitz,

Five Chimneys' by Olga Lengyel.

In 'Operation Paperclip,' it explains how "Himmler wanted Blome to infect human test subjects with plague to see what would happen to them." History sadly repeats itself. There is an excellent interview with Annie and Joe Rogan as well.

I wish it wasn't true. We have all been deceived. The polio vaccine was found to cause brain cancer, the swine flu vaccine cause a polio like disease and the smallpox vaccine (AIDS) and the hepatitis vaccine (AIDS). (Strecker Memorandum)

J. Clemenson at the Danish Cancer Registry, Leukemogenesis, (1973). In addressing an international assembly of leukemia experts said: "We are in fact establishing conditions for a possible pandemic of an oncogenic virus varied on the scale of influenza of 1918."

7 ⤵ | ⤴ • Reply • Share >

Siglund ➔ DubbyD • 2 days ago

So to get this straight...

You OPPOSE the Resident's "mandate" for everyone to take the poison gene shot, but you SUPPORT the president's plan to decimate our economy, destroy our military, make us dependent on foreign nations for energy, and eliminate our currency so that we must use digi-dollars and subject ourselves to the new global governance and "social credit" system.

You won't understand this if you haven't learned it after all these years, but tyrannical communism IS the polar opposite of free-market capitalism.

6 ⤵ | ⤴ • Reply • Share >

Andy Dulavitz ➔ Siglund • a day ago

Except that what we are witnessing is NOT "Free Market" Capitalism. This is "wolf market" capitalism where the titans have joined forces with government to destroy

the free market. Small businesses either being outright destroyed or bought up. They are trying to separate the free from the market and take away your choices. As an economic model it more closely resembles fascism. But we should not be working to hard to put things into neat little boxes. Both Capitalism and the various flavors of socialism are re-inventing them selves with new variants.

1 ^ | v • Reply • Share >

John Stone Mod → Andy Dulavitz • a day ago

Without effective liability it is perhaps not capitalism at all. The bureaucrats who run corporations bear no financial or so far criminal liability for their actions. This has been the problem for a long time, more than a century - but we are coming to a final crunch.

<https://progressive.org/lat...>

3 ^ | v • Reply • Share >

Ed J → DubbyD • 2 days ago • edited

Powerful words. Thank you and God Bless. Free market Capitalism is not inherently evil though, but the perversity and exploitation of it is. We are being forced in to a Corporate-Communist system which is the destructive hybrid of Capitalism and Communism. Government will own most companies by 2030. 50% of Americans will work for the Government in some capacity or another. 30% will be out of work due to AI and robotics and living on meager UBI in government own tenement housing created from abandoned retail and warehousing. 20% will be living off the grid or homeless. The "unvaxed" will be in this 20%. We will have our own underground economy which the Government will try to undermine and destroy. Our Pure Blood and Pure Organs will be sought out by those who have destroyed their own with the Jab. A very troubled world lies ahead in the near future.

James Robert Deal • 2 days ago

It appears that Matthew Memoli only opposes vaccine mandates for the Covid vaccines. Apparently he supports mandates for all the other childhood vaccines - which are now required if you want to go to college.

None of the customary childhood vaccines and none of the Covid vaccines should be mandatory or routine. Those foolish enough to take these vaccines should be free to do so, but they should not be routine or mandatory for any purpose. They are all experimental and reckless. The adverse reactions are worse than the disease vaccinated against.

www.JamesRobertDeal.org/vac...

53 ^ | v 2 • Reply • Share >

Naga → James Robert Deal • 2 days ago

It's downright sickening that this is the case today. I didn't have to take any vaccines going through grade school, high school or university. I had all of the normal childhood diseases. Back then, when someone was sick, we invited them over and everyone caught for example, the chicken pox and we acquired natural immunity which is BETTER than man-made immunity and besides, the director of the CDC is on record saying the product does not stop infection, so what good is it? Anyone trying to push it since this information as come to light tells you that there is another agenda.

16 ^ | v • Reply • Share >

Polly Green → Naga • 2 days ago

My kids are 30+, and we still had non-fetal cell vaccines then. Two were vaccine-injured just the same, one because a physician assumed a vaccine had conferred immunity so he failed to recognize a common childhood infection.

I learned the hard way.

Vaccination is a failed model.

17 ^ | v • Reply • Share >

Tharlene LakesMathis → Polly Green • a day ago

health care is of the pagan religion anyway,not of God at all.
